

DOMYKAMY CYKL.  
OTWIERAMY PRZYSZŁOŚĆ.

R-KONCEPT

WE CLOSE THE CYCLE. WE OPEN THE FUTURE.

## ABOUT US

R-Koncept is a brand from Warmia – the green heart of Poland – born from the need to create in harmony with nature and the principles of a circular economy. We produce boards and furniture from both post-consumer and post-industrial recycled plastic waste.

We believe that what is considered waste can become a valuable material – durable, beautiful, and functional.

We build the system that allows materials to gain many new lives, maximizing their potential. Our products combine responsibility, aesthetics, and innovation, proving that design can and should support sustainable development.

# OUR VISION

For us, ECO means wise product management. In an era of mass production of disposable items, we sought a solution that would allow us to create durable items with a unique style. This is a significant step forward in protecting our planet – we design from waste, without contributing to the creation of new ones. Our products can last for many years or be 100% recycled into new ones.

We have combined our love of nature with years of experience in the plastics processing industry to give waste a second life, thus writing a new, valuable, and unique design story.

## R - K O N C E P T

it is more than a brand, it is a philosophy based on 6R rule

**RETHINK. REFUSE. REDUCE.  
REUSE. RECYCLE. REPAIR.**

We add another R

**REDESIGN**

THIS IS OUR  
VISIONARY  
ELEMENT  
OF YOUR SPACE

## OUR OFFER

Our boards are intended for interior architects and designers, companies and institutions with environmental responsibility, and private customers who seek conscious choices and long-lasting solutions.

The boards are fully monomaterial.

We do not mix different plastics. Thanks to this, the product stays within the material loop and can be reused or reprocessed again in the future.

Each board is unique in color and pattern.

The recycling and forming process ensures that no two surfaces are identical. Every board is one of a kind and gives interiors a unique identity.

We produce boards in the:

**Format: 2400 × 1200 mm**

**Thickness: 9 mm, 12mm 15 mm, 18 mm, 20 mm, 25 mm**

They are durable, stable, and easy to process.

The surface is resistant, lightweight, and ideal for:

- furniture production
- worktops
- wall and decorative panels
- interior design elements

## OUR DESIGNS

### **WARMIA STONE**

Made from recycled catering trays.

A board with a unique structure and texture resembling natural stone, marble, or granite. Elegant in appearance – with a clear story of recovery and responsibility.

### **FOREST BREATH**

A monomaterial board made from HIPS, as if nature had left its breath on its surface.

Although made from plastic, it represents a return to simplicity: one material, one process, conscious resource use.

“Forest Breath” is more than design – it is an attempt to capture harmony between technology and nature. The breath of the forest enclosed in a durable, sustainable form.

## SAND DUST

Natural, fine inclusions in beige, cream, and soft gray tones create a texture reminiscent of wind-shaped dunes. "Sand Dust" stands for simplicity and responsibility: one material, a second life, a minimal ecological footprint. Timeless, calm, and clear in its message.

## OCEAN TIDE

"Ocean Tide" is a board made from HIPS or GPPS that captures the motion of the sea. The surface resembles waves seen up close: layers of white, gray, and deep ocean colors create organic flows, swirls, and textures – like traces left by waves on a rocky shore.

## **FROZEN LAKE**

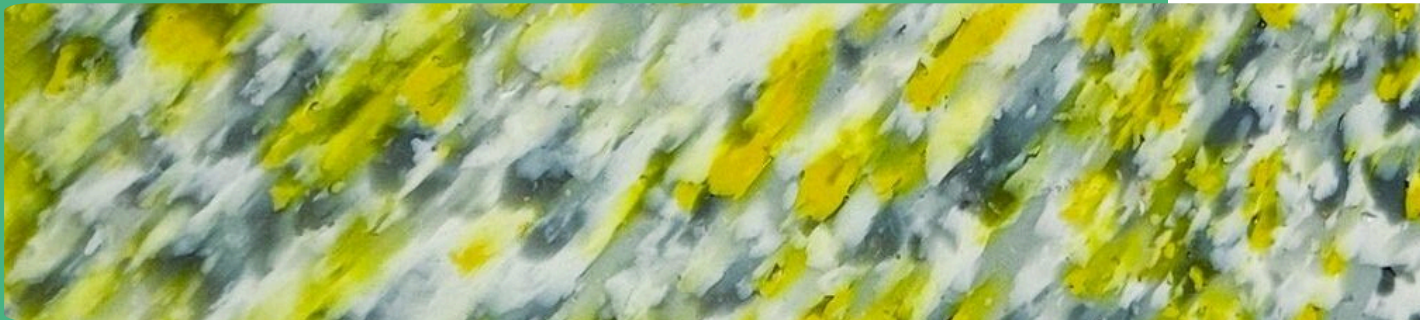

“Frozen Lake” represents cool elegance and a subtle story of transformation.

The surface resembles the frozen water of a Warmian lake – with fine cracks, micro-structures, and light-reflecting shine.

A delicate ice aesthetic integrated into a durable material.

## **SOLAR SWIRL**

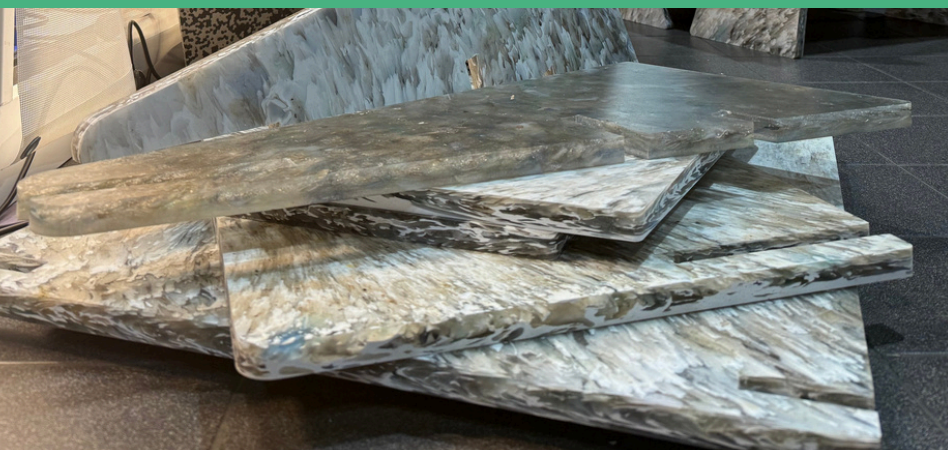

The “Solar Swirl” pattern captures the natural dynamics of light.

Sunny yellows blend with gray and white in fine swirling structures. Each board has an individual pattern, creating a lively organic surface inspired by natural light phenomena.

## **CREATE YOUR OWN COLOR COMBINATION**

Contact us and develop your own custom color and material solution together with us.

## FUNCTIONAL ELEMENTS – OUR FURNITURE

Our furniture is made exclusively from our own boards.

- Monomaterial constructions
- No additional joining materials required
- CNC-milled interlocking joints
- Quick and easy hand assembly
- No visible screws or openings

In the spirit of the circular economy, the customer can return the furniture after 6 years of use. We will create a new product from the same material.
